

## CSE 2102 Group 3 Milestone 2 – User Stories

**User Story 1:** As an adoption counselor, I want the ability to immediately see if the owners are compatible with the pet or not, so that the process would speed up saving time.

**User Story 2:** As an adoption counselor, I want to be able to view the profile of the pets, so that I know what pet I am working with.

**User Story 3:** As an adoption counselor, I want to notify other potential owners of events and volunteering opportunities, so that they can build up their relationship with the pets.

**User Story 4:** As a normal user, I want to be able to see potential matches that are within a 200-mile radius from my home so I can plan my schedule accordingly.

**User Story 5:** As a person with medical needs, I would like to see if they can be trained to be service dogs, so I can check what the pets need beforehand.

**User Story 6:** As a normal user, I would like to see if the animals are family friendly or not, and whether or they are high energy or not, so I can tell if they are compatible or not.

**User Story 7:** As a busy professional, I want to complete the adoption process remotely so that I can adopt a pet without interfering with my schedule.

**User Story 8:** As a parent, I want to ensure that the pet is safe and compatible with my kids so that my family has a great experience.

**User Story 9:** As a public icon, I want a discreet and efficient adoption process so that my personal matters remain private to the public.

**User Story 10:** As an *intake coordinator*, I want to *easily log basic animal information, from basic biometrics to their personalities, health history, and adoption fees*. I need to be able to create and update animal entries quickly to ensure all medical history of rescued animals are up to date.

**User Story 11:** As intake coordinator, I want to be able to remove entries of rescues who are successfully adopted so there is no confusion on which animals are still available.

**User Story 12:** As an active caretaker of the animals, I want to *record observed animal behavior and personality traits* so that *I can help match them with the right adopters*.
